

## Remove e-Cert from IE browser

You should avoid importing your e-Cert file into any computer that is not under your own use (e.g. public computer facilities). In case you want to remove your e-Cert from a computer, please follow the below steps.

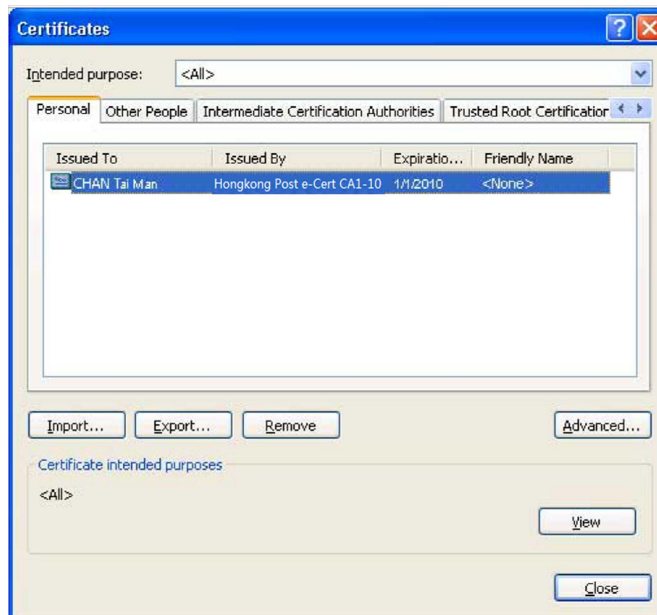

1. In your Internet Explorer browser, Click 'Tools' from the pull-down menu and select 'Internet Options'.

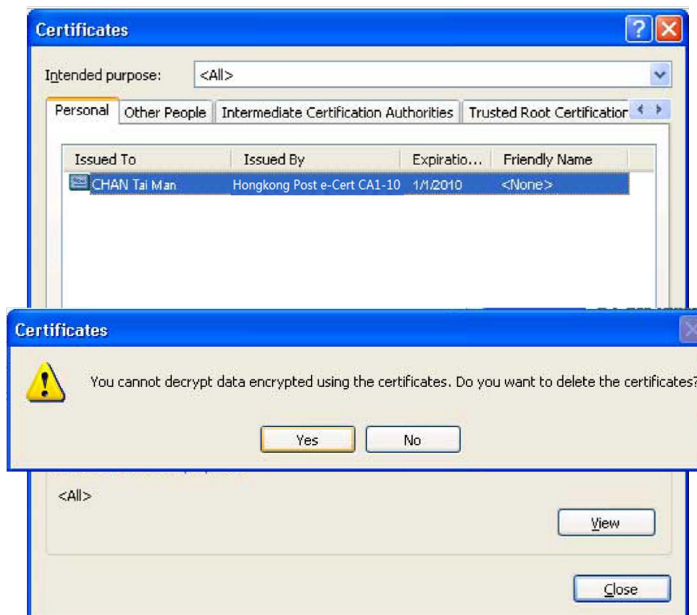

2. The 'Internet Options' window as shown below appears, click the "Content" tab and select "Certificates".

3. Select the 'Personal' tab and click on the certificate you want to remove and click the 'Remove' button.

4. Click 'Yes' to confirm the removal of your e-Cert file.

5. The e-Cert file is being removed from the browser.
